Work Experience

Feb 2023 - Present

Thai Micro Digital Solution (a subsidiary of Thai Credit Bank)

UX/UI Designer

My role involves overseeing project design, converting conceptual ideas into tangible UX/UI designs, user journeys, process flows, and functional prototypes.

project, I was responsible for:

New 2025 "Micro Pay e-Wallet" Application project

- Working with the Business Development (BD) team to collect all necessary requirements and then develop UX/UI mockups and prototypes for the new application.
- Establishing the design system researching and developing the user interface for every function.
- Creating the new 2025 UI interface in accordance with Business Development's specifications.
- The user journey flow for all features within the new application.

Digital Wallet Project (by Government)

- Work with the Business Development (BD) team to collect project requirements and establish system flows.
- Designed and developed the application's UI mockups and interactive prototypes.
- Crafted detailed user journey flows, integrating them with Government's API specifications
- Collaborated closely with the BD team on UI interface design, delivering prototypes for user testing.

New Micro Pay Website Project

- Work with Business Development (BD) and Sales teams to brainstorm and gather ideas for new information Website.
- Provided the ideas and strategic solutions for the website and user experience.
- Developed user journeys for the website.
- Translated ideas into mockups and UI interfaces, culminating in functional prototypes.
- Supported frontend developers by providing information and resolving HTML + CSS
